Your tattoo design

A sample design — describe your own idea to generate one

How to design a tattoo with AI

Three steps from an idea in your head to a design in your hand.

1

Describe your idea

Type the subject, style, and any details — for example, a fine-line fern with small berries. The more specific your words, the closer the first design.

2

Generate and refine

Review the design, adjust your wording, and generate again to explore styles and compositions until one fits.

3

Bring it to your artist

Use your favorite design as a reference for your tattoo artist, who can adapt it to your body, size, and placement.
